ISAP
PACKAGING

An outstanding history.
A history of great specialisation,
strong identity, and the highest
standards of quality.

1963
**Isap is launched in Verona,
together with the OMV
engineering company.**

Isap Packaging. Making History Through Innovation.

1964
Isap creates the first produce containers in plastic.

1972
Isap becomes the first on the market to make glasses in transparent PS.

1974
Isap and OMV create the first technology for manufacturing polypropylene glasses.

1981
Isap introduces custom-printing.

1993
Isap takes the European and international market by storm.

2008
The first glass in super-transparent polypropylene sees the light.

Isap has always been a benchmark for disposable tableware and food-industry packaging.

Solidity, reliability, a strong presence on the market, research, great partnership ties, and a flexible, comprehensive production chain all enable the company to create products together with its customers, from the choice of raw materials to the finished product, complete with custom-printing. The reasons for this undisputed leadership have their roots in forty years of history.

SPECIALISTS IN POLYPROPYLENE.

Isap Packaging is a solid company that has built up a unique wealth of experience in the production and processing of all types of plastic. This know-how is expressed at its highest levels in polypropylene. Considered as the plastic of the future, polypropylene is complex to process and requires highly specialised technologies and expertise.

Isap Packaging today is the real expert in polypropylene, as can be seen in a project that gives polypropylene a key role in recycling: designed for street events, **Ri-evento®** aims to transform disposable tableware into useful objects for the community.

iSAP
PACKAGING

Every innovation is designed
to improve product performance
and to respond to the customer's
needs, always ensuring the very
highest standards of quality.

Research + Development = Quality.

It may look simple but in actual fact it is the result of a constant, tireless commitment to improvement. Always.

Isap Packaging devotes significant resources to research and development.
This is because we believe that we should never be content with any achievement, however great it may be, since the wishes and needs of the market never ceased to evolve.
Isap Packaging has acquired the ability to listen to particular needs and to transform them into tailor-made solutions, creating unprecedented products of true excellence.

**The R&D department guides the
improvement of production performance.**

Thanks in part to its co-partnership with OMV, the company that produces machinery for processing plastic, Isap Packaging has incorporated and implemented cutting-edge technology, in a constant, synergic exchange of know how, opening up new horizons for future machines, and testing and perfecting new patents.

Isap Packaging has become a leading force behind innovation in plastics, constantly expanding its frontiers and surpassing itself in the excellence of its products.
Our R&D department never ceases to search for new materials, new product designs, and new production systems.

Guidelines for product innovation include improved functional characteristics, greater eco-friendliness, better structural performance (resistance, hygiene, safety), and improved aesthetic qualities (design, transparency, personalisation).

CERTIFIED QUALITY.
Quality certification is undoubtedly the first guarantee to ensure the hygiene and safety of food.
Quite apart from the actual certificates obtained, what really matters is the careful selection of raw materials, together with the many meticulous daily checks carried out on every machine, in every department.
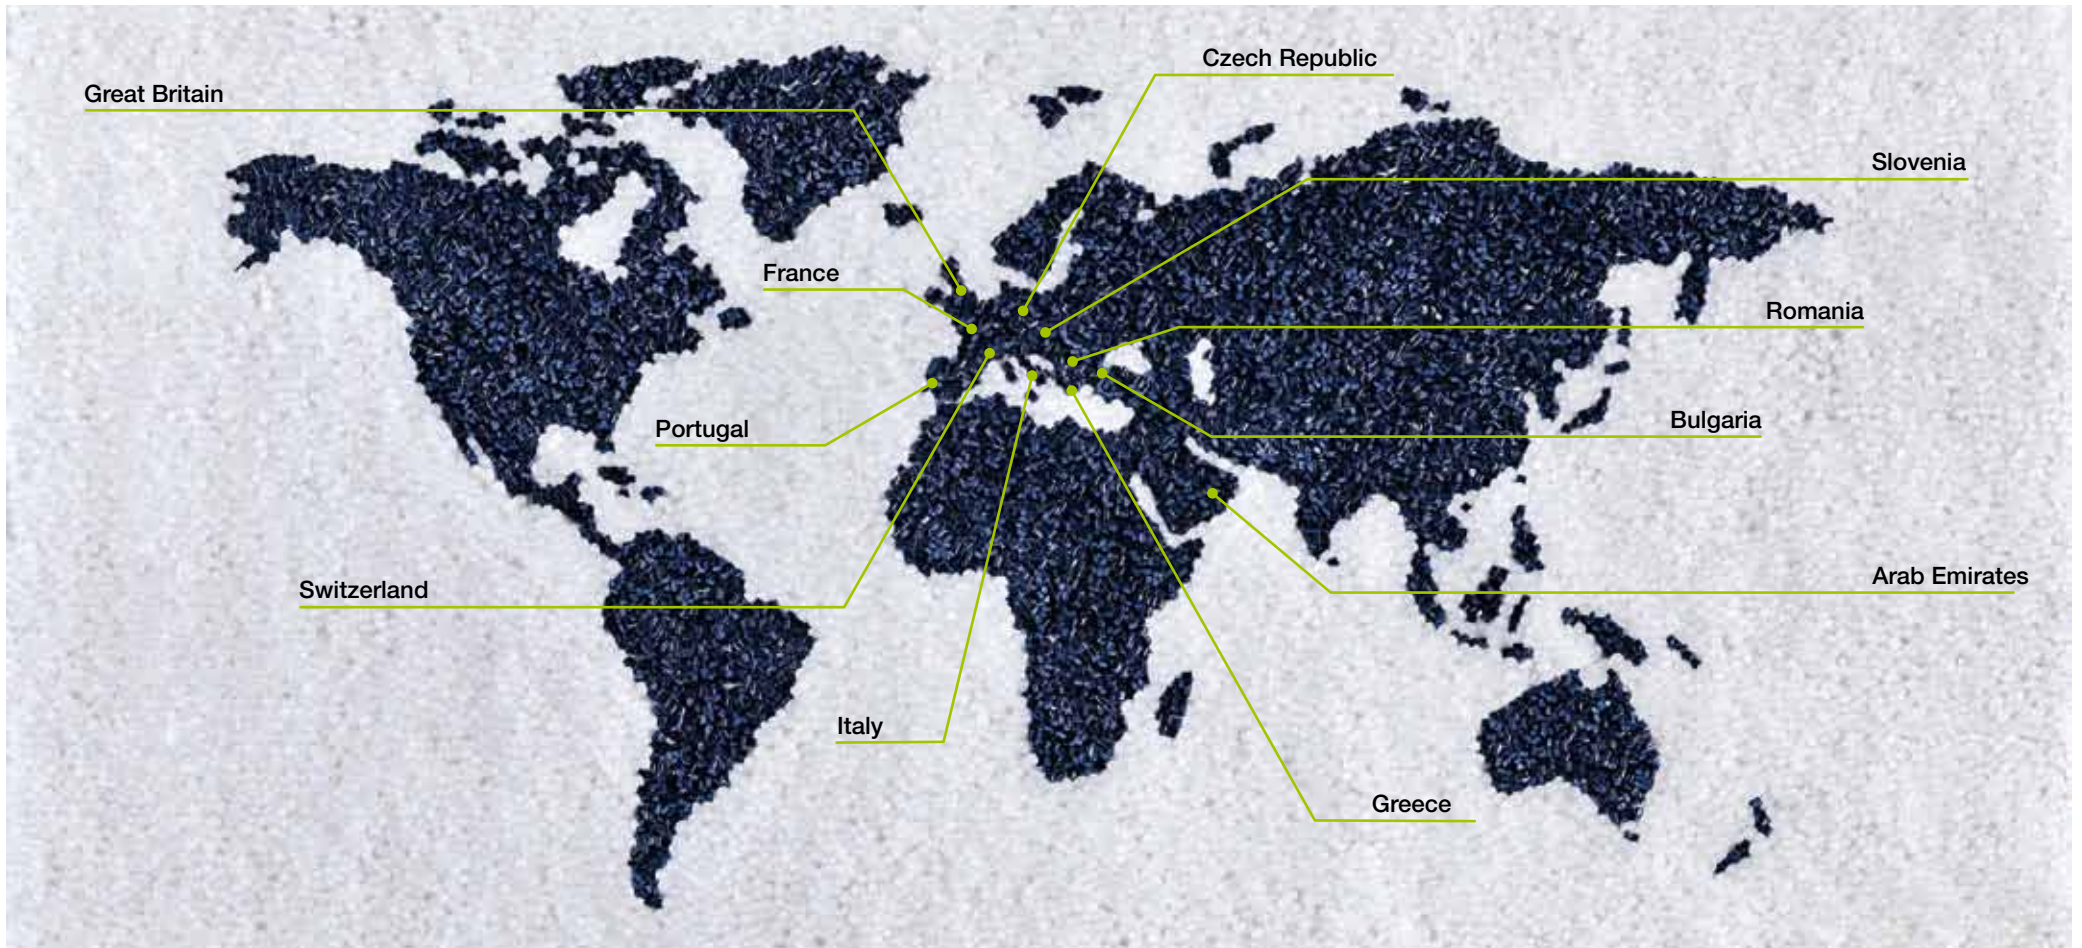

To satisfy EC Regulation 2023/2006 on " good manufacturing practice for materials and articles destined to come into contact with food", Isap Packaging has drafted and implemented a documented self-control plan based on the H.A.C.C.P. (Hazard Analysis and Critical Control Points) system.

This system is used in the food industry to assess potential risks and thus to introduce adequate measures to prevent hygienic and sanitary problems from arising.

The quality certification obtained illustrates our commitment to global quality:
- **UNI EN ISO 9001:2008 CERTIFICATE**
  (TUV Italia Certification Authority);
- **UNI EN ISO 14001 CERTIFICATE: 2004**
  (Tüv certification authority for the Catania plant);
- **CAPACITY CERTIFICATE**
  (Bury Council certification authority);
- **PLA PRODUCT COMPOSTABILITY CERTIFICATE**
  (Din Certco Certification Authority);
- **BRC IOP CERTIFICATE**
  (TUV Italia Certification Authority for the production of plastic packaging and disposable items for the food industry, for fruit and vegetable packers, for the catering sector, and for retail and wholesale trade);
- **CERTIFICATE OF CONFORMACE**
- **PLASTICA SECONDA VITA**
  (IIP Certification Authority for PET trays with functional barrier made of recycled plastic from separate collection).

**Strategic coverage
of leading markets
and distribution channels.**

The total turnover of the Group (also including OMV) is close to €100 million, of which €75 million comes from Isap Packaging. 85% of this turnover is generated by the disposables sector.
Isap Packaging is present on European and international markets with a network of highly experienced agents, and it exports its products to 32 nations, including countries in Africa and Central and North America.

The company has the facilities it needs to cover all Italy, with an extensive distribution network including depots at production plants and local warehouses.

Isap Packaging has also set up a network of distributors and importers, integrated within the Italian logistics system, to respond rapidly and effectively to requests from international markets. This ensures rapid response, customised services, and a constant presence.

The best plastic possible.

The innovative strength of polypropylene is that it can be recycled many times, thus creating a virtuous circle.

RI-EVENTO®
dacosanascecosa®

We would never have come this far without adopting one fundamental principle: respect.
For people and for the world we all live in.

Sustainability is an essential part of all our research: ensuring ever-improved performance, with a particular focus on protecting and safeguarding the environment.
With our great specialisation in polypropylene, we have been able to perfect products and systems that make it possible to recycle the disposable tableware made with this polymer, ensuring the highest levels of hygiene and food safety.
The innovative power of polypropylene, as well as its intrinsic characteristics, which make it robust, unbreakable and heat resistant, is that it can be recycled countless times, creating a truly virtuous cycle.

RI-EVENTO®: *plastic as a resource.*

To give concrete proof of the true value of plastic recycling, Isap Packaging has created
Ri-evento®, a patented system for recycling disposable tableware in polypropylene, when used for collective events, parties, special occasions, concerts, canteens, and trade fairs.

This is a practical, intelligent initiative to raise awareness among the public about environmental issues, by showing how it is possible to reuse plastic materials and turn them into other objects.

The name **Ri-evento®** and the related slogan, "one thing leads to another", have been adopted to give an idea of the countless possibilities of transformation and re-utilisation that can come from the use of disposable plastic tableware during collective events. Recycled polypropylene can be used for a host of different objects, ranging from trays to benches, vases, diaries, binders, refuse bins, and much more besides. Isap Packaging has launched this initiative in partnership with IPPR, Italian Institute for the promotion of recyclable plastics, which was set up with the aim of promoting the use of materials and artefacts made using recycled plastic, marked with the "Plastica seconda Vita" ("Second-life Plastic") logo.

Ri-evento® is a registered Isap Packaging S.p.A. trademark.

From theory to plastic: our products.

**The wide range of products
shows how the company
pays great attention
to consumers' needs.**

Isap Packaging is one of the most versatile manufacturers of disposable tableware on the market.

Glasses, cups, cutlery, bowls, plates, tubs, salad bowls, portion cups, and flûtes: the Isap Packaging range includes all types of tableware and accessories that can be used at the dinner table, or for picnics or parties, and they are ideal for all occasions and locations.

The wide range shows how the company pays great attention to consumers' needs.

CUSTOM-PRINTED GLASSES.

One of the areas of excellence of Isap Packaging is that of custom-printed products, which makes it possible to create collections of glasses and large and small cups decorated with logos and images.
This is an in-company process using offset printing techniques: latest-generation systems ensure absolute hygiene and extraordinarily high-quality results.

Custom-printing: a great way to communicate!

Multimedia.

www.isap-packaging.com:
online information and
interaction with the customer,
creating common actions.

Isap-packaging.com is the interactive venue for news,
updates and interaction with the customer.
Disposables, fruit and vegetables, packaging for foodstuffs:
the three divisions of ISAP now have a dynamic, fresh new
interface.
Users enter the world of ISAP, actively engaging with it thanks
to constant updates and the use of a private platform
for the exchange of information and technical data.

All disposable items and packaging for fruit and vegetables
are catalogued and contained in a database, each with their
own entries and photos, reference data and technical
specifications. A cascading filter helps the user find one
or more parameters to gradually restrict the search.

**INNOVATION, MULTIMEDIA, OPTIMISATION
AND VISIBILITY.
THIS IS ISAP, ON THE WEB TOO.**

PIÙTTOSTO

The Piùttosto collection is made entirely of polypropylene, the polymer best suited for recycling. Its great resistance to impact, abrasions and thermal shock makes these products irreplaceable in all kinds of situations, from private parties to canteens and great outdoor events.

PIÙTTOSTO

Piùttosto glasses are shatterproof, resistant, and suitable for hot and cold beverages.
Available in two versions: transparent and white. Can be custom-printed.

PETÌ

This shatterproof range is notable for its shatterproof quality and transparency, which is guaranteed by the use of PET, a material that is perfect for recycling.

PETÌ
SALAD BOWLS

The transparency of the Petì salad bowl is quite outstanding.
The lid makes it ideal for transport and for the trendiest occasions on the go.

CAFFETTERIA

A complete range for the perfect coffee break, available in many shapes and materials. Thermo cups in EPS, cups in polystyrene or polypropylene, cups for automatic dispensers and accessories (spoons, stirrers, lids).

CAFFETTERIA

Pride of place in the range is given to the coffee and cappuccino cups in polystyrene, with their unmistakable double-wall design (the cup does not get hot on the outside, while maintaining the right temperature inside). The lid maintains all the freshness and aroma of the coffee or other drink, as well as facilitating transport.

ECOKAY®

A range of completely biodegradable, compostable products made with materials from renewable sources including corn starch, cellulose pulp, bamboo, and bioplastics.

The EcOKay® range is particularly suitable for events at which the refuse collection process makes it possible to dispose of waste in industrial composting plants. EcOKay® glasses are made of PLA, a material derived from corn starch. Perfect for drinks that do not exceed 40 °C.

CUSTOM-PRINTABLE (minimum quantity 50,000 pcs). Custom-printable, offset, up to 6 colours.
